

How do I change my password?

For security, we recommend you change your password regularly. Here's how:

1. Log in by clicking the **Sign In** button on the top right corner which takes you to the page below. (What to do if you don't remember your password)

The screenshot shows the WoodSourceBC website's sign-in interface. At the top left is the logo "WOOD SOURCE BC" with the tagline "Where wood buyers find sellers - online." To the right are "Sign Up" and "Sign In" buttons. A navigation bar contains links for Home, About, For Sale, Wanted, Advanced Search, Help, and Contact Us. The main content area is titled "Sign In" and includes a welcome message, tips, and input fields for Account ID and Password. Below the fields is a "Sign In" button. Further down are links for "Help me reset it." and "Create an account." The footer contains a "Newsletter Signup" form, links for "Advertise Sponsor Resources" and "Our Partners Terms of Use Privacy Policy", and the WoodSourceBC logo and tagline.

Change Password

Your password must be at least 8 characters long with at least one upper case letter and at least one lower case letter and at least one number in it.

Avoid passwords such as 'password' or 'secret' with a single number added, or those that use your name, business name, or a family member's name.

A great way to create a password is to think of a phrase and turn the initials or words into a password. To incorporate the number, you might choose to change any letter o's into zeroes and letter L's into ones.

For example, if you ran a pet store, you might think of the phrase 'I sell cat food' and then change it to Ise11catfood (where the two L's are changed to 1's). Then it is easy for you to remember, but hard for people to guess.

4. Read the recommendations on that page about choosing a secure password.
5. Type your new password into the two boxes on the page.
6. Click **Change my Password Now**.
7. Your new password is now in effect and you will need to use it the next time you log in. Note that if you log out right now, you will be redirected back to the **Change my Password** page the next time you log in (because the system always takes you back to the last page you were on). This does not mean that you need to change the password a second time.
